

Case Study

Successfully navigated Northern California's challenging permitting protocols and built 3 small grid-tied solar projects in PGE territory.

Solar Collective:

- Development, construction, operation and maintenance
- **Negotiated Interconnection** and revenue contract with utility
- **Performed environmental analysis** to determine the optimal placement for the solar footprint within the available land, so as to not disturb any potential wetlands/wildlife
- Maintained and operated by Solar Collective founders until 2022

Feed-In Solar Projects, California 1.5MW
